

Projects

JOB NAME	North 40 Pipeline Rack
LOCATION	Sherwood Park, AB
ROLE	General Mechanical Contractor
CLIENT	Transmission Company
START DATE	April, 2017
COMPLETION DATE	December, 2017
VALUE	\$14,000,000

This project was part of the Baseline Terminal (BTT) Interconnect Project connecting the BTT to the Edmonton South Rail Terminal, Edmonton South Terminal, Enbridge North Terminal and the Kinder Morgan North 40 Terminal.

Scope of work included:

- General contractor for upgrading the existing inlet metering area to include 5 new inlet lines and 6 new metering runs
- Supply, fabrication and installation of structural steel and piping
- Subcontract management scopes for Helical and Concrete Piles, Electrical and Instrumentation, Insulation and scaffolding
- Completed 138 welded and bolted tie-ins that were completed over 19 separate system outages.

This project was completed within an existing and operating oil terminal where extensive above ground and underground infrastructure was present and in close proximity to the work area.
