

Fabrication

Serving Western Canada since 2007, TAHK Projects is a General Industrial Contractor providing construction of small to large size facility projects. From our two fabrication facilities, we offer a streamlined process for offsite module assembly in a secure space. The gravelled and fenced 13 acre yard, provides ample space to setup up and concurrently work on 10 full sized modules.

With over 35,000 square feet of indoor fabrication space, TAHK specialized in pipe spooling and hydrotesting along with certain structural shapes and sizes. In-house drafting capabilities, utilizing AutoCAD, in conjunction with Navisworks, allows for an efficient flow of information for fabrication, quality and material control processes.

In-House Capabilities:

- Materials management and storage
- Electrical & Instrumentation module wiring
- Pipe fabrication
- Steel fabrication
- CadWorx spool drafting
- Spool pressure testing
- Module assembly
- Subcontractor management

Markets:

- Oil & Gas
- Renewables & Carbon Management
- Canola & Food Processing

Projects:

- Oil & Gas Field Facilities - Production / Processing
- Compression & Pump Stations
- Hydrogen & Renewable Energy
- Cogeneration
- Oil & Gas Storage
- Tank Farms & Terminals

Fabrication Locations:

Grande Prairie, AB

13 acre secured and fenced yard
35,000 sq. ft. facility
15,000+ weld inches output/month
T: 1.780.567.3331

Sherwood Park, AB

2.5 acres
15,000 sq. ft. facility
10,000+ weld inches output/month
T: 1.780.416.7770

Calgary, AB

Business Development
