

Module Assembly—Piperacks

TAHK Projects has the expertise to construct a wide variety of modules. With over 35,000 sq. ft. of indoor fabrication facility space and 13 acres of outdoor secure space, TAHK can work with you to complete your next project.

Below are examples of projects we have completed.

Main Piperack Modules

This project included:

- Complete fabrication and assembly of 25 piperack modules
- Supply of SGA & PVF shorts
- Supply, fabrication and erection of 330T of structural steel
- 12k FDI of spool fabrication
- Test, coat and install 8500 LM of piping
- Supply and install EHT/cable tray and insulation

Module Assembly—Metering & Prover

Metering & Prover Skids

This project included:

- Assembly of 3 skids
- Supply of SB PVF & SGA
- Supply and erect 40T of structural steel
- 3,000 FDI of spool fabrication
- Test, coat & install 185 LM of piping
- Supply & install EHT/cable tray and insulation

Metering & Prover Skids

This project included:

- Assembly of 3 skids
- Supply of SB PVF & SGA
- Supply and erect 20T of structural steel
- 3,000 FDI of spool fabrication
- Test, coat & install 250 LM of piping
- Supply & install insulation including soft covers

Module Assembly—Inlet Module

Inlet Modules

This project included:

- Supply all pipe, fittings, SGA and small bore valves
- Supply and erect structural steel
- 18,000 FDI of spool fabrication
- Test, coat and install piping
- Supply and install E&I and insulation

Module Assembly—Inlet Skid

Inlet Skids

This project included:

- Supply all pipe, fittings, SGA and small bore valves
- Supply and erect 130T of structural steel
- 17,000 FDI of spool fabrication
- 1500 LM of piping—all externally coated and largely internally coated
- 750 valves and 1300 torques
- E&I and Insulation including soft covers
